### Historical Comparison

There were increases in 2014 compared to 2013 in some of these subject substances due to increased production at Massilly.

### Reduction Plan Objectives and Targets:

Where practical and technically and economically viable, Massilly intends on addressing methods to reduce the use and releases of organic substances in their facility. Massilly will identify and evaluate practices that will reduce the loss of residues of the subject substances by up to 10 % over the next 2 to 5 years.

### Reduction Options Under Consideration for Implementation:

Eliminating base coats on applicable products will result in reduced coating use equating to reduced use and releases of the subject organics substances. Massilly is also considering reusing residual cleaning solvents for the initial equipment cleaning process.

### Additional Actions and Their Impact on Substance Use, Creation and Discharge:

Massilly will continue to follow best operating practices by providing Pollution Prevention training/updates for employees.

**Amendments or Changes to Toxic Reduction Plans During Report Period:**

No amendments or changes have been made to the facility's toxics reduction plans.
